Using the E-Manual

View the embedded E-Manual that contains information about your TV's key features.

Disclaimer:

Instructions and images through this manual are only for reference and may differ from the actual product.

Launch the E-Manual

Press button on your remote control and select Settings > Support > E-Manual.

Enter the Home screen of the E-Manual.

Press INPUT / button on your remote control and select **TV**, then press button on your remote control and select **E-Manual**.

Enter **Enjoy Live TV** chapter to learn more about how to set up Live TV features.

Press INPUT / - button on your remote control and select Connection Guide.

Enter **Connecting to External Devices** chapter to learn more about how to connect external devices to your TV and how to set up.

Note:

- The black background icon indicates the button on the remote control.
- The grey background icon indicates the icons on the TV screen for selecting.

Use the Buttons in the E-Manual

Search

Search for the product feature information, the E-Manual will provide all the titles and content that contains the search information.

QR Code

Scan the QR Code with your Smart Phone to open the E-Manual on your device.

Try Now button

Select Try Now, and it will guide you to the corresponding TV menu for trying the function.

Home Screen

All TV functions can be accessed from the Home screen.

- 1. Navigation bar
- 2. Apps

Note:

Indicators or icons may vary depending on models/countries/regions.

Display the Home Screen

Press button on your remote control to enter the Home screen.

To exit the Home screen, press **INPUT** / button on your remote control or use the navigation buttons to move the focus to the **Input** icon on the top of the screen, press **b** button to enter and select your desired input source.

Use the Navigation Bar

The navigation bar refers to indicators and icons on the top of the Home screen.

Note:

- Indicators or icons may vary depending on models/countries/regions.
- Q Search

Search the content you want.

■ Input

Select the input source depending on the device you have connected to your TV.

Settings

Manage TV configuration.

Notifications

Allow pop-up notifications to appear for useful information and events that occur with your TV, including: **Advertising**, **New Arrivals**, **Warnings and Legal Statements**, **System Messages** and **Alexa Notification**. You can enable/disable each of these notifications at Settings in the notification centre.

You can view the list of event messages generated by the TV.

To delete all notifications, select Clear All.

Note:

- The Alexa Notification may not be applicable in some models/countries/regions.
- When you sign into your VIDAA account, please find Notifications in VIDAA Account on the Home screen.

2 VIDAA Account

A VIDAA account provides all the best features of your Smart TV and ensures that all services are kept up to date.

For more information about VIDAA account, please refer to Benefits of Smart TV > Using a VIDAA Account in this manual.

Voice

Quick access to **Voice Service**. For more information, please refer to Benefits of Smart TV > Voice Service Setup in this manual.

Guide

Quick access to Guide. For more information, please refer to Enjoy Live TV > Programme Guide (EPG) in this manual.

Live TV

Quick access to Live TV. For more information, please refer to First-Time Use > Prepare Live TV in this manual.

Time

You can always view the current time at the top of the Home screen.

Network

Connect your TV to the Internet through a wireless connection $\ \ \,$ or an Ethernet cable $\ \ \,$, and the corresponding icon will appear.

Use the Shortcuts

You can add inputs, channels and websites to the Home screen to have quick access to them for your convenience.

Add and remove inputs

- 1. Press INPUT / button.
- 2. Move the focus to an input you want to add to the Home screen and press > Add to home > . The input icon will appear in Shortcuts on the Home screen.

Note:

- Some options from the input source page cannot be added to the Home screen.
- To remove the input from Shortcuts, move the focus to the shortcut, then press and hold the object button on your remote control.

Add and remove channels

- 1. In Live TV, press ok/ button to access the channel list.
- 2. Press button and press button to tick channel(s) that you would like to add on the Home screen.
- 3. Select Add to home. The channel icon will appear in Shortcuts on the Home screen.

Note:

• To remove the channel from Shortcuts, move the focus to the shortcut, then press and hold the or button on your remote control.

Add and remove webpages

- 1. In Browser, visit a website you would like to add on the Home screen.
- 2. Use the D-pad to move the focus to the **Menu** icon in the top of the Browser navigation bar and select Add to home.
- 3. Select Add and this webpage will appear in the Shortcuts on the Home screen.

Note:

• To remove webpages from Shortcuts, move the focus onto the shortcut page, then press and hold the button on your remote control.

Connecting to the Internet

To get access to the Internet using a wired connection or connecting to an available wireless network.

Connect to a Wired (Ethernet) Network

To get access to the Internet using a wired connection, it is recommended to use a modem or router that supports Dynamic Host Configuration Protocol (DHCP). Modems and routers that support DHCP automatically provide the IP address, netmask, gateway, DNS Server 1 and DNS Server 2, so you do not have to enter them manually. Most home networks already have DHCP.

After connecting to a wired (Ethernet) network, press button on your remote control, and select Settings > Network > Network Configuration.

Set the TV network by selecting **Network Configuration** and press or button to enter the submenu.

· Connection Type

Choose a wired (Ethernet) network connection to access the Internet.

Ethernet

Display network status.

IP Settings

Configure the IP setting for your network connection.

Related information

Network Issues on page 79

My TV cannot connect to the network. on page 71

Connect to a Wireless Network

To connect to an available wireless network, make sure that you turn on your wireless router and have the wireless router's SSID and password before attempting to connect.

To get access to the Internet using a wireless connection, press (a) / (b) button on your remote control, and select (a) Settings > Network > Network Configuration.

Set the TV network by selecting Network Configuration and press on button to enter the submenu.

· Connection Type

Choose a wireless network connection to access the Internet.

Advanced Settings

Configure the advanced wireless network settings for the TV.

Add

You can add a wireless network.

Refresh

Refresh wireless network.

Note:

- If no wireless router is found, select Add and enter the network name in the SSID.
- If no wireless router is found, select Refresh.

Related information

My TV cannot connect to the network. on page 71

Setup via Mobile Phone

When you turn on the TV for the first time, the TV will support setup via your smart device by scanning the QR code.

If you scan the QR code to allow setup via the mobile app, setup of the TV will be more efficient.

Before performing setup with the mobile app, please make sure your mobile device has Bluetooth activated and is connected to the same Network as your TV.

Note:

The setup above is for referencing purpose and may differ depending on models/countries/regions.

Prepare Live TV

Connect satellite/antenna/cable to the TV

Note:

- TV jacks may vary and satellite/antenna/cable function may not be applicable in some models/countries/ regions.
- You may also connect devices that can receive broadcast signals such as a Set Top Box.

Start auto scan or manual scan

1. Press INPUT / - button on your remote control and select TV.

2. Press button on your remote control and select Settings > Channel > Auto Scan/Advanced Settings > Manual Scan.

Using External Devices

Access to connected external devices including wireless connected devices.

Switch between external devices connected to the TV

- 1. Press INPUT / button on your remote control or press (a) / (a) button to move the focus to the Input icon on the top of the Home screen, press (b) button to enter.
- 2. Select your desired input source.

Edit the name of input sources

Method 1:

- 1. Press INPUT / button on your remote control or press (a) / (a) button to move the focus to the Input icon on the top of the Home screen, press (b) button to enter.
- 2. Move the focus to an input source and press button on your remote control.
- 3. Select Rename.

Method 2 (for some models):

Press h / button on your remote control, and select Settings > System > Advanced Settings > Input Labels to edit the name of input sources.

Note:

· Some input sources cannot be renamed.

Using the TV Voice Service

Select Voice Service on the TV

To access the Voice Service and select a voice assistant:

- press (a) / (a) button on your remote and select (b) Voice icon in the navigation bar;
- or press **(9)** button on your remote control;
- or press (A) / (A) button to select (b) Settings icon, and select System > Voice Service.

Use the remote microphone

You can enjoy interacting with voice assistant using your voice by just pressing and holding the **()** button on your remote control.

Note:

- · Voice Service feature may not be applicable in some models/countries/regions.
- To use this function, End User License Agreement and corresponding Smart feature privacy policy/terms and conditions may be required to be agreed to.

Voice Service Setup on page 27

Guidelines

Note:

- Guidelines content is only applicable in Germany.
- The actual design of remote control could differ.

How are TV channels sorted and why?

Channel sorting

The availability of individual channel may depend on the selected reception path, such as satellite (DVB-S/ S2), cable (DVB-C) or antenna (DVB-T2) and the signal strength.

Standard or an operator (Astra 19.2°, Vodafone (NRW, Hessen, BW) or Pÿur) can be selected for automatic channel search.

To sort channels when selecting an Operator:

When an operator is selected, the channels are sorted based on the operator's criteria.

Channel sorting when selecting Standard:

After a successful channel search, the channels are sorted by genre. These include full programmes, children, sports, documentaries, or regional and local programmes.

Broadcasters with less coverage and, if available, international channels are listed in alphabetical order after the pre-sorted list.

If LCN (Logical Channel Number, only possible with cable reception) is activated during the channel search, the sorting takes place according to the criteria of the local cable network operator.

Search by Channel name

The search within Live TV can be opened with the **W** button. Here you can search for individual channels by name.

Radio Transmitter

Radio channels are listed in alphabetical order after the list of TV channels.

To make finding radio channels easier, the filter function of the channel list is recommended (please refer to Display Channel List in this manual).

Sponsored Content

On the basis of bilateral contracts with the respective broadcasters, individual channels are placed in a position defined by the broadcaster in the channel list.

Sort Manually

The channel list can be manually sorted at any time. More information can be found in Edit Channel List and Edit Favourite Channel List in this manual.

How are apps sorted and why?

The applications on the VIDAA platform are positioned according to the bellow criteria.

In the Application Docker on the Home Launcher:

To ensure equal representation of apps and provide fair treatment of newly launched content partners, the applications are ordered based on the (i) global number of users, (ii) number of users in Germany, (iii) number of subscribers in Germany, (iv) share of local language content, (v) variety of content, and (vi) novelty of the platform. At all times the Application launcher must include:

- · the 2 leading global SVOD platforms
- · the 2 leading global TVOD platforms
- the 2 leading global AVOD platforms
- · the leading local sports platform
- · at least 4 leading local applications with predominantly German content
- · at least 1 leading application with children's content
- · at least 2 applications that have launched in the last 6 months

The ordering of applications is reviewed every 6 months and a new programming table is issued for newly connected devices.

In the My Apps section:

The applications are ordered in alphabetical order.

How can TV channels and apps be customised?

TV channels

In Live TV, press or less button on your remote control and press button to select a Live TV channel category such as Antenna or Cable, then use D-pad to select **Edit**.

Alternatively, in Live TV, press button, select **Settings > Channel > Channel Edit**, and select a Live TV channel category such as Antenna or Cable.

- Press button on the selected channel, then a checkbox will appear. You can select multiple channels at the same time to move or delete.
- Move: Press button to move the selected channel.

Moving the channels could be restricted by the operator. If you want to be able to move channels, it is recommended not to choose an operator during channel scan, LCN should be set to **Off**.

- Delete: Press > button to delete the selected channel.
- Restore: Press [RED] button, or press (4) button to display the colour menu and select RED to enter the list of deleted channels. Press (4) button to restore the deleted channel.
- Filter: Press [YELLOW] button or press button to display the colour menu and select YELLOW, the filter screen will pop up. Press button to select options, the channel list can be updated.
- Search: Press [BLUE] button or press (button to display the colour menu and select BLUE to search the channel.

Favourite list

Viewing your favourite list

In Live TV, press or/ button on your remote control and press button, then select **FAV1-4** to display the favourite list.

Editing the favourite list

In Live TV, press **(N)** button on your remote control and press **(S)**, and select **FAV1-4**, then use D-pad to select **Edit**.

Alternatively, in Live TV, press button on your remote control, and select **Settings > Channel > Channel Edit**. then select **FAV1 - FAV4**.

You can add, move or remove favourite channels.

- Select (+) Add channels to add the selected channel to the favourite list.
- Select a channel in a favourite list, press button to move it.
- Select a channel in a favourite list, press > button to remove it.

Apps

♠ / ♠ > More Apps

Factory installed apps:

Select the item you want to move, then long press button, use the D-pad to move it, and press button to store position.

Non-factory installed apps:

Select the item you want to move, then long press button to select **Sort**, use the D-pad to move it, and press button to store position.

Note:

· Some Apps cannot be moved.

How are recommendations created?

Recommendations on the platform are dependent on the ability and willingness of partners to provide metadata to the platform. The content is positioned depending on the following criteria:

Above the fold applications:

The recommendations originate from the Content partners that are highlighted. They are in the domain of the end-user.

Below the fold applications:

Recommendation rows are created by the editorial team, following these guidelines:

- 1. Content variety Providing a broad selection of content
- 2. Type of access variety Providing advertising-supported, subscription, and transactional content
- 3. Balance Providing a balance between global and local content

Channel Scan

You can scan for channels automatically or manually.

Auto Scan

Automatic channel scan.

- 1. Press NPUT / Substitution on your remote control, and select TV.
- 2. In Live TV, press button and select Settings > Channel > Auto Scan.

If no TV channels were saved before, you will be prompted to do a channel scan.

Satellite

- Single satellite: You can use single satellite if you only have one satellite installed.
- **DiSEqC**: You can choose DiSEqC if you have DiSEqC equipment. Up to four satellites in DiSEqC 1.0 mode can be installed.

If you are using a motorised antenna, you can use DiSEqC 1.2 mode.

• Unicable: If your home is equipped with Unicable satellite distribution, you should use this option.

Please make sure that you know the Unicable band and frequency to be used. The information should be available on the equipment or the landlord can provide it.

Antenna

- Channel: Select from All Channels or Free Channels. This option may not be available depending on countries/regions/operators.
- Scan Mode: Select from digital channels only (DTV), digital and analogue channels (DTV+ATV) or analogue channels only (ATV).

If you receive DVB-T or DVB-T2 signal, you can use DTV.

LCN: Switch on/off LCN (Logical Channel Number).

Please note that some operators are restricted to manually change the channel order. If you switch off LCN, then the channel list can be edited after channel scan.

This function may not be applicable in some models/countries/regions.

Cable

- Channel: Select from All Channels or Free Channels. This option may not be available depending on countries/regions/operators.
- **Scan Mode**: Select from digital channels only (DTV), digital and analogue channels (DTV+ATV) or analogue channels only (ATV).
- LCN: Switch on/off LCN (Logical Channel Number).

Please note that some operators are restricted to manually change the channel order. If you switch off LCN, then the channel list can be edited after channel scan.

This function may not be applicable in some models/countries/regions.

Note:

· Satellite/antenna/cable function may not be applicable in some models/countries/regions.

Prepare Live TV on page 8

Manual Scan

Manually scan for channels for DTV or ATV.

- 1. Press NPUT / button on your remote control, and select TV.
- 2. In Live TV, press button on your remote control and select Settings > Channel > Advanced Settings > Manual Scan.

DTV Manual Scan

Manually scan for DTV services.

When the DTV Manual Scan screen appears, press button to select **Antenna**, **Cable** or **Satellite** and configure corresponding settings. Then select **Start** to commence the search of that channel. When the signal has been received, the signal strength will be displayed on the screen.

ATV Manual Scan

Manually scan for ATV services.

- Frequency: Input the channel frequency you want.
- · Picture System: Select the Colour System.
- · Sound System: Select the Sound System.

Note:

• Satellite/antenna/cable function may not be applicable in some models/countries/regions.

Channel Edit

Manually edit the channel list or favourite channel list to your preference.

Edit Channel List

Before you can edit the channel list, Channel Scan must be completed first.

In Live TV, press or button on your remote control and press button to select a Live TV channel category such as Antenna or Cable, then use D-pad to select **Edit**.

Alternatively, in Live TV, press button, select **Settings > Channel > Channel Edit**, and select a Live TV channel category such as Antenna or Cable.

Manage the channels

- Press of button on the selected channel, then a checkbox will appear. You can select multiple channels at the same time to move or delete.
- Move: Press button to move the selected channel.

Moving the channels could be restricted by the operator. If you want to be able to move channels, it is not recommended to choose an operator during channel scan, and LCN should be set to Off.

- Delete: Press > button to delete the selected channel.
- Restore: Press [RED] button, or press (4) button to display the colour menu and select RED to enter the list of deleted channels. Press (4) button to restore the deleted channel.
- Filter: Press [YELLOW] button or press button to display the colour menu and select YELLOW, the filter screen will pop up. Press button to select options, the channel list can then be updated.
- Search: Press [BLUE] button or press (button to display the colour menu and select BLUE to search for a channel.

Export the channel list to USB

The current channel list can be exported to a USB storage device.

In Live TV, press button on your remote control and select **Settings > Channel > Channel Edit > Export to USB**.

Import the channel list from USB

Previously exported channel lists can be imported via a USB storage device.

In Live TV, press button on your remote control and select **Settings > Channel > Channel Edit > Import from USB**.

Edit Favourite Channel List

Before you can edit the favourite list, Channel Scan must be completed first.

Add a channel to a favourite list

You can add channels from various reception types to the favourite list.

- 1. In Live TV, press or / button to display the channel list.
- 2. Press button and select the channel(s) you want to add to the favourite list.
- 3. Select Add to Favourite and choose from FAV1-FAV4.
- 4. Then, a heart-shape icon will appear next to the added channel.

Move or remove channels in a favourite list

In Live TV, press (M) (www button on your remote control and press (S), select **FAV1-4**, then use D-pad to select **Edit**.

Alternatively, in Live TV, press button on your remote control and select **Settings > Channel > Channel Edit**, then select **FAV1-FAV4**.

You can add, move, or remove favourite channels.

- Select (+) Add channels to add the selected channel to the favourite list.
- Select a channel in a favourite list, and press button to move it.
- Select a channel in a favourite list, and press button to remove it.

Programme Info

While watching TV programmes, press \(\bar{\lambda} / \) button to load the programme info bar.

- 2. Channel number
- 3. Channel name
- 4. Indicator of Favourite
- 5. Date and time, and channel category

- 6. Current programme
- 7. Next programme

Note:

- The remote control buttons may vary depending on models/countries/regions.
- · The image is only for reference and may differ from the specific product.

Programme Guide (EPG)

The Guide (EPG) provides a convenient way to check TV programmes for the upcoming 8 days. The information displayed by the Guide (EPG) is made available by the commercial television networks for digital channels only. The Guide (EPG) also provides a simple way to record your favourite programmes and a reminder function, which can switch channels automatically at scheduled times, so that you will not miss programmes of interest. The availability and amount of programme information will vary depending on the broadcaster.

Note:

• The Guide (EPG) function is only available for digital channels. Analogue channels are not supported.

Launch the Guide

In Live TV, press button, or press button and select **Guide (EPG)** to display programme guide.

Learn about the Guide menu

Watch

In Guide (EPG), when a current programme is selected, press > **Watch** to switch to the channel you want to see.

PVR/Reminder

In Guide (EPG), press button to select the channels. Press button to select programme based on the time schedule.

Press on button to select PVR or Reminder.

For more information, please refer to Enjoy Live TV > Programme Recording (PVR) or Enjoy Live TV > Reminder in this manual.

Note:

• The PVR function may not be applicable in some models/countries/regions.

Scheduled

In Guide (EPG), press [RED] button or press (4) button to display the colour menu and select RED. This will display a list of scheduled reminders and recordings.

Programme Colour

In Guide (EPG), press [GREEN] button or press (4) button to display the colour menu and select GREEN. Use the colours to indicate different genres in the Guide (EPG) for quick and easy viewing.

Note:

• This function may not be applicable in some models/countries/regions.

24h-

In Guide (EPG), press [YELLOW] button or press \bigoplus / (23) button to display the colour menu and select YELLOW to select programmes of the previous day.

· 24h+

In Guide (EPG), press [BLUE] button or press $\{\}$ button to display the colour menu and select BLUE to select programmes of the next day.

Programme Recording (PVR)

The PVR function allows you to easily record digital television content for later viewing.

Read before Recording Programmes

- To use PVR, you must connect a storage device for recording. PVR will not function if a data storage device has not been connected.
- The format of the storage device can be NTFS or FAT32. The storage space of your device should be no
 less than 2GB (for 15 minutes high-definition video). It is strongly recommended to use a USB mobile hard
 disk drive instead of a USB flash drive as the storage device.
- If the transfer rate of your hard disk is too slow, a pop-up notice will be displayed. In this case, you will need to use another disk with higher speed.
- PVR is only available for digital channels and does not support analogue channels.
- Some broadcasters may restrict the recording of programmes.
- If a recording is made from a locked channel, the system PIN will need to be input to playback the recorded content.
- Some channel-related configuration may conflict with background recording. In this case, a reminder window will pop up.
- The PVR function may not be applicable in some models/countries/regions.

Recording

Schedule Recording

In Live TV, press button and select PVR.

Alternatively, press \(\bar{\lambda} / \(\bar{\text{lim}} \) button to load the info bar, and select a programme and choose PVR.

If your remote has button, press it and use D-pad to select to set up PVR.

You can select recording mode from time, manual stop and programme.

When you select time, you can set the booking time and period.

In Guide (EPG), press the [RED] button or press button to display the colour menu, select RED to view the scheduled recording. In the schedule recording list, you can readjust the reservation information that has been set.

Standby Recording

If you press the power button during recording and select **Standby Recording**, your TV will go into standby mode, but the recording process will continue. If you press the power button again to wake up the TV, the recording process will not be affected. After recording, the recorded file will be automatically saved to the attached USB disk.

Background Recording

When you switch to an App or another source (e.g. HDMI) during recording, the recording process will continue. When the recording has completed, the recorded programme will be automatically saved to the attached USB disk.

If you want to manually stop recording, press INPUT / button on your remote control and select **TV** to switch back to the channel that is currently being recorded, and then press / button and select on-screen to stop.

Learn about the recording control bar

- 1. Recording time
- 2. Total time
- 3. Rewind
- 4. Pause / Play
- 5. Fast forward
- 6. Stop

Note:

The PVR function may not be applicable in some models/countries/regions.

Recording List

Access recording list

In Live TV, press button on your remote control and select **Recording List**.

Watch recorded programmes

In Live TV, press button on your remote control and select **Recording List > Recorded**.

Select a recorded programme in the recording list and press on button to watch it.

If you connect more than one storage device to the TV, **Recorded (Disk for Recording)** and **Recorded (All Disk)** are available on-screen to select.

Manage recording list

In Live TV, press button on your remote control and select **Recording List > Recorded**.

You can sort or delete recorded programmes.

· Sort recorded programmes

Select All, and you can choose from the list to sort the recorded programmes.

Note:

- This function may not be applicable in some models/countries/regions.
- · Delete recorded programme

Select **Edit**, select a recorded programme in the recording list and press **S** button to delete it.

Manage schedule recording list

In Live TV, press button on your remote control and select Recording List > Scheduled.

You can adjust the schedule recording information or cancel scheduled recordings. Schedule recording items are identified with \bigcirc icons.

· Delete scheduled recording

Select **Edit**, select a scheduled recording in the schedule list and press button to delete it.

· Edit scheduled recording

Select scheduled recording in the schedule list, then press of button to edit.

Note:

· The Recording List function may not be applicable in some models/countries/regions.

Reminder

Setup this feature to allow reminders to be displayed of future programmes.

Set up a Reminder

- 1. In Live TV, press / FB button, or press / S > Guide (EPG) to display programme guide.
- 2. In Guide (EPG), press \(\int \struct \) button to select the channels. Press \(\int \struct \) button to select a programme that has not been aired.
- 3. Press ok button to select Reminder.

Note:

· Reminder is only available for programmes that have not been aired yet.

Manage the Reminder List

In Live TV, press button on your remote control and select Recording List > Scheduled.

You can change reminder information or cancel reminders. Reminder items are identified with (icons.

Delete reminder

Select **Edit**, select a reminder in the schedule list and press button to delete it.

Edit reminder

Select reminder in the schedule list, then press on button to edit.

Timeshift

This option allows you to pause and rewind Live TV. This function operates by recording temporarily to a storage device. Please ensure your storage device is connected and there is enough free disk space, otherwise timeshift will not function.

In Live TV, press button on your remote control and select **Timeshift**, then the playback bar will appear.

If your remote control has button, press it and press button to launch Timeshift.

- 1. Unwatched time for buffered content
- 2. Current time
- 3. Total time
- **4.** Record: to convert a Timeshift to a live recording of the current broadcast channel. Select and the programme content you have watched in Timeshift will also be saved to the storage device.
- 6. | Pause/ Play
- 7. Fast forward: you can choose 2×, 4×, 8× or 16×.
- 8. Stop Timeshift: to exit the function and watch the current broadcast.

Note:

- The Timeshift function does not support analogue channels.
- The storage space of the device should be no less than 2GB. It is strongly recommended to use a USB mobile hard disk drive instead of a USB flash drive as the storage device.
- The Timeshift function may not be applicable in some models/countries/regions.

HbbTV

Access service from providers through HbbTV.

Press hutton on your remote control, and select Settings > System > Application Settings > HbbTV.

Enable or disable HbbTV functionality for all channels (only available for digital channels).

In Live TV, press button to select **HbbTV**.

Enable or disable HbbTV functionality for the current channel (only available for digital channels).

When HbbTV service is enabled and the programme supports HbbTV, follow the instructions on the TV screen to select the corresponding button on the remote control to access the service.

Note

- This function may not be applicable in some models/countries/regions.
- Some channels may not support the HbbTV service.
- HbbTV cannot be used during Timeshift or PVR.

Learn about Live TV Support Settings

· Channel List Auto Update

Press button on your remote control and select **Settings > Channel > Advanced Settings > Channel List Auto Update**.

Allow your TV to automatically update the channel list from the content provider.

· Programme Guide Auto Update

Press button on your remote control and select **Settings > Channel > Advanced Settings > Programme Guide Auto Update**.

TV will automatically update the Programme Guide data overnight while in stand-by mode.

CI+ Module Settings

Press button on your remote control and select Settings > Channel > Advanced Settings > Cl+ Module Settings.

Review the CI+ settings: Common interface, CI card PIN and CAM Profile Search. This function may not be applicable in some models/countries/regions.

PVR & Time Shift

Press button on your remote control and select **Settings > System > Advanced Settings > PVR Time Shift**.

Format the external USB disk to support PVR and Time-Shift. When you connect more than one USB storage device to the TV, the one selected in **PVR Setup** or **Time Shift Setup** is initalized for starting recording or launching timeshift. The recorded programme will be saved in the selected storage device. When launching timeshift, programme will be recorded temporarily to the selected storage device.

You can add padding time to start recording before the event starts, or after the event has finished by delaying the end of recording depending on how much Padding time is added, this is setup in **Start in advance** or **Delay Ending**.

Search

In Live TV, press **V** button to search for channels.

Parental Control

Turn on Parental Control to prevent children from being able to view certain content. For more information, please refer to Settings Overview > Using Parental Controls in this manual.

· Picture and Sound

Adjust picture or sound mode or other advanced picture or sound settings. For more information, please refer to Settings Overview > Picture or Settings Overview > Sound in this manual.

Using a VIDAA Account

Sign into your VIDAA account and create multiple profiles to receive personalised content according to your account preferences.

Sign into an account

Before signing into your VIDAA account, make sure your TV is connected to the network. For more about network settings, please refer to First-Time Use > Connect to the Internet > Connect to a Wired (Ethernet) Network or Connect to a Wireless Network in this manual.

- 1. After the network is connected, press (a) / (b) button on your remote control and select (2) VIDAA Account icon in the top navigation bar on the Home screen.
- 2. Register your device to your VIDAA Account. After entering your E-mail and password, select Sign In.
- 3. You can create a profile and give it a name.

If you forget your password and need to change the password, select **Forget Password?**, input your E-mail address and verification code, then create a new password.

Create a new account

If you do not have a VIDAA account, create a new one to enjoy the best features of your Smart TV.

Before creating a new account, make sure your TV is connected to the network. For more about network settings, please refer to First-Time Use > Connect to the Internet > Connect to a Wired (Ethernet) Network or Connect to a Wireless Network in this manual.

- 1. After the network is connected, press (a) / (b) button on your remote control and select (2) VIDAA Account icon in the top navigation bar on the Home screen.
- 2. Select Create an Account on screen.
- 3. Enter your first name, last name, E-mail address and password. First Name and Last Name are optional.
- 4. Select Create an Account.

Voice Service Setup

Set up voice assistant to control your TV by your voice.

Note:

- Voice Service feature may not be applicable in some models/countries/regions.
- To use this function, End User License Agreement and corresponding Smart feature privacy policy/terms and conditions may be required to be agreed to.

Alexa Setup

Set up Alexa, and enjoy Alexa voice service. You can ask for information, streaming music, search for your favorite movies, control your TV and more, just by asking Alexa.

Before setting up the Amazon Alexa Service, connect your TV to the network and sign into your VIDAA Account at \(\begin{align*} / \begin{align*} > & VIDAA Account. \end{account} \) More information about how to sign into the VIDAA Account, please refer to Benefits of Smart TV > Using a VIDAA Account in this manual.

How to set up Alexa

For 4K models

Interact with Alexa by pressing and holding the microphone button on your remote control. You can ask Alexa to control this TV.

- 1. Press 🍙 / 🍙 button to select 💿 Settings icon, and select System > Voice Service > Amazon Alexa.
- 2. Select **Set voice assistant to Alexa** and **Set Up Alexa**. If you have selected Alexa in the Guide when you turn on the TV for the first time, it will directly guide you to the **Set Up Alexa** step.
- 3. Select Amazon Alexa supported voice language from the selection.
- **4.** You are now at the step 'Sign into your Amazon account'. Scan the QR code with your mobile device or visit the website on your mobile device or computer and enter the on-screen code. The code will expire after 10 minutes. If you do not have an Amazon account, create a new one.
- **5.** After you have linked the Amazon account, the TV screen will change to the next step. You can sign into your VIDAA account. If you have signed in before, this step will be skipped.
- 6. Now Alexa is set up and ready. You can enjoy interacting with Alexa using your voice by just pressing and holding the **(Q)** button on your remote control. Ask Alexa after the tone.

For 2K models

- 1. Press 🍙 / 🍙 button to select 🍥 Settings icon, and select System > Voice Service > Amazon Alexa.
- 2. Give your TV a name.
- 3. Download the Alexa app on your mobile device. Open the app and sign in with your Amazon account.
- **4.** Search and enable VIDAA Voice skill following the instrucion. After the skill is enabled, you will be prompted to finish device paring. Please finish device paring with this TV, and make sure this TV is discovered by Alexa before using Alexa service.
- Now Alexa is set up and ready. You can enjoy interacting with Alexa using your voice by just by asking Alexa.

Note:

- The Alexa function may not be applicable in some models/countries/regions.
- The setup steps above may vary. Please refer to the specific product.
- Shipment with voice remote control varies depending on TV models/countries/regions.
- You can use Alexa without signing into your account by skipping the sign in section. In this case, you can still use your voice to change the channel and control playback. Sign into your account in the settings menu at any time to enjoy more functions of Alexa.
- This feature requires Alexa built-in service. Otherwise, use external Alexa-enabled devices (e.g. Alexa App, Echo) to control your smart TV by using just your voice.
- Download and install the remote control app on your mobile device at Settings > Support > Mobile App Download. Press the Microphone icon in the app to interact with Alexa on your TV.

Remote & Accessories

Connect remote controls or other accessories, such as keyboard, mouse and gamepad, to interact with your Smart TV with ease.

Connect Remote Control

Connect a Bluetooth remote control

Pair the Bluetooth remote with the TV.

- 1. To pair the Bluetooth remote control to the TV after you power the TV on, press (a) / (a) button on your remote control, and select (b) Settings > Network > Bluetooth, and set Bluetooth to On.
- 2. Keep the remote control within 3 metres of the TV. Press any button (except power and mic button) to pair the remote control with the TV.

Note:

- In special cases, press and hold button to pair.
- This function may not be applicable in some models/countries/regions.
- If an error occurred while trying to pair the remote control, it could have been caused by interference. Try to remove what is causing the interference and try pairing again.
- If an error occurred with the remote control while using sufficiently charged batteries, you can remove the batteries for 1~2 seconds then insert them once again. Now the remote control should work correctly.
- The remote control cannot be paired to the TV while the TV is in standby mode.

Use HDMI & CEC

Use the TV remote to control external devices that are connected to the TV by a HDMI cable. The external devices need to support HDMI & CEC function.

Press button on your remote control and select Settings > System > HDMI & CEC.

Connect an external device through HDMI & CEC function

Press hutton on your remote control and select Settings > System > HDMI & CEC > CEC Control.

Allow HDMI devices to control each other.

- 1. Set CEC Control to On.
- 2. Connect a HDMI & CEC compatible device to the TV.
- 3. Turn on the connected external device. The device will be connected to the TV automatically. After connection is completed, you can access the menu of the connected device on your TV screen using your TV remote and control the device.
- **4.** When CEC control is enabled and HDMI & CEC compatible external devices are turned off, the TV will enter the standby mode. The function needs to be supported by the external device.

Enable device auto power off

Press hutton on your remote control and select Settings > System > HDMI & CEC > Device Auto Power Off.

Set to **On** to turn off HDMI & CEC compatible external devices when the TV is turned off.

Enable device auto power on

Press hower On. Settings > System > HDMI & CEC > Device

Set to **On** to turn on HDMI & CEC compatible external devices when the TV is turned on.

This feature is applicable when TV input source is pre-set to the corresponding external device.

Enable TV auto power on

Press hutton on your remote control and select Settings > System > HDMI & CEC > TV Auto Power On.

Set to **On** to turn on the TV when HDMI & CEC compatible external devices are turned on.

HDMI format function

Press hutton on your remote control and select Settings > System > HDMI & CEC > HDMI Format.

Please select **Enhanced format** if your HDMI device supports 4K HDR. If it does not support 4K HDR, please select **Standard format**. If you are not sure, please select **Auto**.

Note:

- HDMI cables must be used to connect HDMI & CEC compatible devices to your TV.
- The HDMI & CEC feature of the connected device must be turned on.
- If you connect a HDMI device that is not HDMI & CEC compatible, the HDMI & CEC control features will not work.
- Depending on the connected HDMI device, the HDMI & CEC control feature may not work.
- The HDMI & CEC feature supports One Touch Play, Routing Control, System Standby, Device OSD Name Transfer, Remote Control Pass Through, Give Device Power Status, System Audio Control.

Using AirPlay and HomeKit

Note:

This function may not be applicable in some models/countries/regions.

Using Airplay

Use AirPlay to wirelessly share audio and video content from your iPhone, iPad, or Mac to your TV. Stream music and videos, share your photos, or mirror exactly what's on your device's screen.

AirPlay is a source in Inputs. Press the INPUT / - button on your remote control to select the AirPlay, then select AirPlay and HomeKit Settings. You can also find AirPlay and HomeKit settings in system settings on your TV.

How to use AirPlay:

1. Make sure your Apple device is connected to the same network as your TV.

- 2. Locate the AirPlay icon on supported media apps, or the Screen Mirroring icon in Control Center on your Apple device. Depending on the content, these steps may vary:
 - To mirror your device's screen, open Control Center and tap Screen Mirroring

 .
 - To stream audio from supported music or podcast apps, tap AirPlay audio @ .
 - To stream video from supported apps, tap AirPlay video
- 3. Select your TV from the list to begin using AirPlay.

Note:

- An AirPlay-enabled TV.
- The TV and Apple devices are connected to the same network.
- · The icon is only for reference. In some apps, you may have to tap another icon first.
- If an AirPlay passcode appears on your TV screen, enter the passcode on your Apple device to continue.

Using HomeKit

Use HomeKit to easily and securely control your TV using your Apple devices.

- **1.** To set up HomeKit, open AirPlay and HomeKit settings on the TV. Locate the HomeKit section and select 'Set Up'.
- 2. The HomeKit setup screen will display a pairing QR code on the TV. Use your iPhone or iPad to scan the QR code, then follow the on-screen directions to complete HomeKit setup.

Note:

· Available operations vary depending on the version of the app and software.

Connecting USB Devices

Connect USB devices, such as hard drives and USB memory sticks for browsing photos or listening to music.

Read before connecting USB devices

USB disk sizes 4GB, 8GB, 16GB, 32GB, 64GB, 128GB and other common market sizes are supported. Up to 8TB hard drives are supported.

Supported formats: NTFS, FAT32.

Select the content you want to play or view. For more information, please refer to Entertainment > Media in this manual.

Use the USB storage device function

The USB storage device function can be used to record and view digital broadcast programmes.

Read the precautions below before recording or viewing programmes by using the USB storage device function.

Note:

- · Be sure to select the correct country/region for use.
- Use of the recording function may not be applicable depending on the selected country/region. Use with
 incorrect settings may violate certain laws or other regulations, and may result in criminal punishment. In
 such cases, our CORPORATION and the Group shall bear no responsibility whatsoever.
- Recorded programmes saved in the USB storage device can only be viewed on this TV. They cannot be viewed when connected to another TV (including the same model of TV), a PC, or other devices.
- You cannot watch one channel while recording another.
- If the recording time to the USB storage device is too short, no data may be saved.
- You cannot record video input signals in the USB device.
- Not all types of broadcast may be recordable.
- After programming the TV to record digital broadcasting, do not disconnect the power plug before recording starts.
- If video or audio recording fail due to malfunction of the TV or poor reception, no compensation shall be paid.
- Certain digital cameras may not be compatible with the TV.

Connecting Headphones

You can connect a pair of headphones (not provided) to the HEADPHONE port on your TV. While the headphone is connected, the sound from the built-in speakers will be disabled.

Note:

- · Headphone port may not be available in some models.
- · Headphones with microphones are not supported.
- If Headphone with Speakers is selected at 🍙 / 🍙 > 🍥 Settings > Sound > Headphone > Headphone Mode, the headphone and the TV will have sound output at the same time.
- Related information

Headphone Settings Setup on page 53

Connecting Audio Visual (AV) Devices

Connect with a composite video cable

To connect an AV device with a composite video cable (not provided), see the illustration below.

When the connection is completed, press **INPUT** / button on your remote control and select **AV** as the input source.

Note:

- AV IN port(s) may vary depending on model type.
- AV IN port(s) may not be available in some models. Please use other port(s) to connect AV devices.
- · For some models, RCA Jack to AV cable may not be supplied.

Connect with a HDMI cable

To connect an AV device with a HDMI cable (not provided), see the illustration below.

When the connection is completed, press **INPUT** / button on your remote control and select the corresponding HDMI input.

Note:

- Please refer to the User Manual of your device for step-by-step instructions.
- Some devices, such as DVD players, require the HDMI signal to be set to the correct format in the device settings. Please consult your device user manual for instructions.
- If there is no sound from your TV, configure the device audio settings.
- Related information

Use HDMI & CEC on page 36

Connecting Speakers or Other Audio Receivers

To connect speakers or other audio receivers with an audio cable (not provided), see the illustration below.

Ensure the audio connected devices are switched on before switching on the TV.

When the connection is completed, press (a) / (b) button on your remote control, select (c) Settings > Sound > Speakers > Audio Output and select the SPDIF Only option.

When a digital audio system is connected to the DIGITAL AUDIO OUT port, decrease the TV volume and use your digital audio system to control the volume.

Note:

- If you prefer to use Audio Return Channel (ARC) or enhanced Audio Return Channel (eARC), please refer to Connecting to External Devices > Connecting a Digital Audio System with ARC/eARC in this manual.
- You can connect the DIGITAL AUDIO OUT port on the back of the TV to the optical port on the amplifier.
 Then press (a) / (a) button on your remote control and select (b) Settings > Sound > Speakers > Digital
 Audio Output to choose Dolby Audio Dolby Digital to receive the Dolby Digital audio.
- Related information

Select Speakers on page 52

Connecting a Digital Audio System with ARC/eARC

If you would like to use the Audio Return Channel (ARC) or enhanced Audio Return Channel (eARC) feature to send sound from the TV by a HDMI cable to a digital sound system, you can connect it to the HDMI (ARC/eARC) port of your TV.

By using this feature, you can also control the sound system with your TV remote instead of using the remote controls from the connected devices.

After the connection:

- 1. Power on the sound system.
- 2. Press h / h button and select Settings icon on the Home screen.
- 3. Select Sound > Speakers > Audio Output, and choose ARC option. If the device supports eARC function, press button and select Settings icon on the Home screen, then select Sound > Speakers > eARC to set eARC to On.

Note:

- Audio receiver must support ARC/eARC function.
- If the device has an Input Selector feature, then make sure to change it to TV.
- When this port is used for ARC/eARC function, it can be used as signal input when a DVD is connected to an amplifier and the amplifier is connected to the TV at the same time. Some amplifiers may not support series connection.

• 5.1 CH (channel) audio is available when the TV is connected to an external device that supports 5.1 channel surround sound. You can press (a) / (b) button and select (c) Settings icon on the Home screen, and select Sound > Speakers > Digital Audio Output to choose Dolby Audio - Dolby Digital Plus to receive the 5.1 channel audio.

Connecting a PC

You can connect a PC to the TV with a HDMI cable to use your TV as a PC monitor.

After connecting the PC, press INPUT / - button and select the connected PC as the input source.

Note:

- For better image quality, set the PC's resolution to a format which is supported by the TV.
- If there is no sound from your TV, change the PC's audio settings.
- If you want to connect your PC and TV wirelessly, please refer to Benefits of Smart TV > Content Sharing
 or Connecting to External Devices > Sharing your Smart Phone/Computer Screen on the TV in this
 manual.

Picture

Adjust picture mode, picture size and other advanced picture settings.

Choose a Picture Mode

Press button on your remote control and select Settings > Picture > Picture Mode.

Select a pre-set picture mode to best suit the content you are viewing.

Note:

Options may differ depending on your model/country/region and the content you are watching. Please refer
to the specific product.

When you use a normal signal

Standard

Use Standard mode for watching normal content, such as News, Drama or Documentaries.

· Cinema Day

Use Cinema Day for watching movies in a bright environment.

· Cinema Night

Use Cinema Night for watching movies in a dark environment.

Dynamic

Use Dynamic mode for content that requires vivid picture quality.

Sports

Optimised picture for watching sports.

Change the Aspect Ratio

Press button on your remote control and select Settings > Picture > Aspect Ratio.

Adjust the Aspect Ratio to stretch or zoom the picture.

Auto

Automatically switch Aspect Ratio between 16:9 and 4:3 based on the signal information.

16:9

Best suited for 16:9 Widescreen content. This will also stretch 4:3 content to Widescreen.

4:3

Best suited for 4:3 content.

· 21:9

Best suited for 21:9 content, generally used in game scenarios.

Movie Zoom

Fill the entire screen by zooming in to remove horizontal black bars from the top and bottom of the picture.

· Dot to Dot

Displays the native signal without any scaling.

Note:

The options above may not be applicable in some input sources.

- Using special functions to change the size of the displayed image (e.g. changing the height/width ratio) for the purpose of public display or commercial gain, may infringe on copyright laws.
- If the aspect ratio of the selected format is different from the TV transmission or video content, it can distort the picture.
- · When connecting a PC to the TV via HDMI input, fast moving images may become distorted.

Smart Scene

Press button on your remote control and select Settings > Picture > Smart Scene.

Smart Scene will enable your TV to continually recognise the scene and enhance the picture quality on all input sources.

Note:

- Some specific applications have explicit constraints meaning content recognition is not allowed.
- This function may not be applicable in some models/countries/regions.

Advanced Picture Settings Setup

Press button on your remote control and select Settings > Picture > Picture Mode Settings.

Adjust display settings for each Picture Mode. You can personalise the picture quality by adjusting the following settings. Options may not be applicable depending on your model/country/region and the picture mode you selected.

Apply Picture Settings

Apply current picture mode settings to all the input sources or just the current source.

Backlight

Set the overall brightness of the screen.

Note:

The function name may vary depending on the model type.

The following option may differ depending on model type, please refer to the actual product.

Dynamic Backlight Control

Enhance the contrast ratio between light and dark areas of the picture.

This function may not be applicable in some models/countries/regions.

Backlight

Adjust how bright you want images to appear, lower settings create darker images.

This function may not be applicable in some models/countries/regions.

Automatic Light Sensor

TV will automatically adjust the picture settings according to the amount of ambient light in the room.

This function may not be applicable in some models/countries/regions.

Light Sensor Shift

This feature is adjustable only when Automatic Light Sensor is turned on. If the picture is too bright, decrease the value. If the picture is too dark, increase the value.

This function may not be applicable in some models/countries/regions.

Local Dimming (or Peak Brightness Dynamic Range for some models)

TV will automatically adjust the backlight in specific areas of the screen according to the contrast changes in the image.

This function may not be applicable in some models/countries/regions.

Brightness

Adjust the Brightness level to generate lighter or darker images.

Contrast

Adjust the Contrast level to increase or decrease how bright images appear.

Colour Saturation

Adjust the colour intensity of the picture for a more vibrant image.

Sharpness

Adjust how sharp or soft the edges of images appear.

Adaptive Contrast

Automatically adjust dark areas and light areas of the image to see more detail.

Ultra Smooth Motion

Reduce the afterimage effect when viewing fast-moving objects.

This function may not be applicable in some models/countries/regions.

Clear Motion

Reduce judder and blur from video content.

This function may not be applicable in some models/countries/regions.

· Noise Reduction

Improve the picture quality by reducing noise.

MPEG Noise Reduction

Reduce MPEG block noise to provide clearer edge transitions.

Colour Temperature

Adjust how warm (red) or cool (blue) the white areas of an image appears.

Expert Settings

Adjust advanced picture settings based on your viewing preference.

Overscan

Change the video size setting to crop the edges of the displayed image.

This function may not be applicable in some models/countries/regions.

Reset Current Mode

Restore all the picture settings in the current picture mode to the factory default values.

Expert Settings Setup

Press hotton on your remote control and select Settings > Picture > Picture Mode Settings > Expert Settings.

Adjust the colour space and Gamma to best suit the content you are viewing. Options may not be applicable depending on your model/country/region and the picture mode you selected.

Colour Gamut

Change the range of colours the TV displays.

This function may not be applicable in some models/countries/regions.

Colour Tuner

Adjust the Hue, Saturation and Brightness of colour settings.

· White Balance

Adjust the intensity of red, green and blue to view the true colour of all images in the picture.

Black Level

Adjust the HDMI Black Level to enhance current content.

Gamma Adjustment

Adjust the Gamma to alter how the TV will respond to grayscale content. In low ambient light choose a higher number, in brighter ambient light select a lower number. The default setting of 2.2 is recommended for most ambient light conditions.

This function may not be applicable in some models/countries/regions.

Gamma Calibration

Adjust selected Gamma curve.

This function may not be applicable in some models/countries/regions.

Viewing Angle

Provide a better viewing experience when watching TV from anywhere in the room.

This function is only available in models supporting the Viewing Angle Control feature.

RGB Only Mode

RGB filter for adjustment and control of colour space and colour saturation.

· Low Blue Light

Eye care: reduce the emission of blue light.

This function may not be applicable in some models/countries/regions.

Picture Issues on page 77

Sound

Adjust sound mode and other advanced sound settings.

Choose a Sound Mode

Press button on your remote control and select Settings > Sound > Sound Mode.

Select a pre-set sound mode to suit the content you are listening to.

Standard

In Standard mode, the TV delivers a flat frequency response, which preserves the natural characteristics of the original sound.

Theatre

Theatre mode increases the surround sound effect and provides a more prominent bass response.

Music

In Music mode, low and high frequencies are emphasised to enhance musical instrument reproduction.

Speech

In Speech mode, low and high frequencies are attenuated to improve the reproduction and clarity of the human voice.

Late Night

In Late Night mode, the TV will improve the reproduction and clarity of the human voice with a low volume level.

Sports

Optimised sound for watching Sports events.

Note:

Options may differ depending on your model/country/region and the content you are watching. Please refer
to the specific product.

Dolby Atmos

Press https:// button on your remote control and select Settings > Sound > Dolby Atmos.

Set **Dolby Atmos** to **On** to enhance the richness of sound allowing a more immersive listening experience.

Note:

• This function may not be applicable in some models/countries/regions.

Sound Mode Settings Setup

Press button on your remote control and select Settings > Sound > Sound Mode Settings.

Adjust the audio settings of the TV. You can personalise the sound quality by adjusting the following settings.

Apply Audio Settings

Adjust current sound mode to apply to all sources or just the current source.

Total Sonics

Optimise the overall sound quality by increasing bass and widening the sound field to provide a clear, natural dialogue.

This function may not be applicable in some models/countries/regions.

Total Volume

Maintain a consistent loudness level for a wide dynamic range of programmes, loud commercials and channel or input changes.

This function may not be applicable in some models/countries/regions.

· Total Surround

Provide surround sound experience with psycho-acoustic processing to place sounds at the side, behind and above the viewer. For best results use with Total Sonics.

This function may not be applicable in some models/countries/regions.

Bass Boost

Bass Boost uses DTS TruBass™ to enhance the perception of bass frequencies to provide deep, rich bass response from the TV's internal speakers.

This function may not be applicable in some models/countries/regions.

Surround Sound

Surround sound uses DTS TruSurround™ to deliver an immersive surround sound experience from the TV's internal speakers.

This function may not be applicable in some models/countries/regions.

Dialog Clarity

Dialog Clarity uses DTS Dialog Clarity™ to boost the frequency range of the human voice so dialogue is clearly understood and heard above audio or surround effects.

This function may not be applicable in some models/countries/regions.

TruVolume

Automatic control over large volume changes while watching TV programmes or films, providing a more comfortable and consistent volume.

This function may not be applicable in some models/countries/regions.

Equalizer

Boost the volume at different frequencies.

This function is only applicable when TV Speaker is selected at (a) / (a) > (a) Settings > Sound > Speakers > Audio Output.

Subwoofer

Enable / Disable internal subwoofer.

This function may not be applicable in some models/countries/regions.

· Bass Boost Value

Built-in bass adjustment.

This function may not be applicable in some models/countries/regions.

Wall Mount Setup

Automatically optimise the sound based on the position of the TV.

This function may not be applicable in some models/countries/regions.

Auto Volume Control

Activate to prevent the volume from changing when switching TV channels.

This function may not be applicable in some models/countries/regions.

Reset Current Mode

Restore all of the audio settings in the current audio mode to the factory default values.

Note:

 Some models may not support decoding of DTS CD bitstreams. Playback of this format may produce undesirable noise.

General

You can set up system settings.

Note:

• The menus displayed vary depending on models/countries/regions.

Set Time

Press button on your remote control and select Settings > System > Time.

Set the current time based on your location.

Time Format

Set the time display to be 12 or 24-hour format.

Date/Time

Set the Date and Time. You can set the date and time to automatically sync with Internet/broadcast or manually setup by yourself.

This function may not be applicable in some models/countries/regions.

· Time Zone

Select your time zone.

This function may not be applicable in some models/countries/regions.

Daylight Saving

Select whether to apply Daylight Saving Time to the TV.

This function may not be applicable in some models/countries/regions.

Use Timer

Press button on your remote control and select Settings > System > Timer Settings.

Adjust the timer settings to suit your preference.

Sleep Timer

Set the sleep timer to automatically turn the TV off at the specified time.

Power On Timer

Set the time you want the TV to turn on automatically. You can set the same time each day or set a different time on different days.

Power Off Timer

Set the time you want the TV to turn off automatically. You can set the same time each day or set a different time on different days.

Menu Timeout

Set the amount of time you would like the menu to remain on the screen.

Auto Sleep

Set the amount of time that you would like the TV to auto power off after a period of no activity.

This function may not be applicable in some models/countries/regions.

Auto Standby with No Signal

TV will go to standby if there is no signal after the set time.

Use System PIN

Press button on your remote control and select Settings > System > System PIN.

Change the PIN that you use to access Parental Control, Auto Channel Scan and Reset to Factory Defaults.

Set Language and Location

Press h / button on your remote control and select Settings > System > Language and Location.

Select the language used for this TV and your location.

Location

Choose the location from where you will watch your TV.

Postcode

User can change the Postcode. This function may not be applicable in some models/countries/regions.

· Menu Language

Set the default language for the TV menu.

· Primary Audio

Set the default audio output language for the type of digital broadcast content that you are viewing.

Secondary Audio

Set the secondary audio output language for digital broadcast content.

Digital Teletext

Adjust Teletext decoding.

Edit TV Name

Press how button on your remote control and select Settings > System > Advanced Settings > TV

You can edit the name for your TV to be used on the network.

Note:

Up to 18 characters can be entered.

Power Indicator Mode Setup

Press how / button on your remote control and select Settings > System > Advanced Settings > Power Indicator.

Set the power indicator display to stay On or Off when in Standby mode.

Press (a) / (b) button on your remote control and select (a) Settings > System > Advanced Settings > Indicator Light Setting.

Set the indicator light from Power, Always or Off.

Note:

The above functions may not be applicable in some models/countries/regions.

Screensaver

Press h / button on your remote control and select Settings > System > Advanced Settings > Screensaver.

Activate a screensaver when your TV displays a still image for a period of time. Set the time according to your preference.

Note:

• This function may not be applicable in some models/countries/regions.

Restore your TV to the factory default. Reset will clear your personal settings, information and data. Enter the PIN code on-screen to enable the Factory Reset.

Game

Connect your game console and adjust the settings to optimise the TV screen for better gaming entertainment.

Connect a Game Console

You can connect your game console with a HDMI cable to the TV.

To start a game from a game console:

- 1. Switch on your game console.
- 2. Press NPUT / button. Select the connected game console as the input source.
- 3. Start the game.

You can enable the game mode to optimise your TV's settings when playing games with a game console.

Game Mode

Press button on your remote control and select Settings > Picture > Game Mode.

Enable **Game Mode** to optimise the TV's settings to enjoy a better gaming experience with a PC or a game console connected to the TV.

Game Mode will allow:

- Reducing input lag to make sure every press or click matches what is happening on the screen;
- · Improving responsiveness to produce very little motion blur;
- Processing YUV 4:4:4 format signals precisely to present accurate image colours.

Note:

• This function may not be applicable in some input sources or applications.

Sports

Sports mode setup in picture or sound settings

Press hutton on your remote control and select Settings > Picture > Picture Mode > Sports.

Optimised picture for watching sports.

Press h / button on your remote control and select Settings > Sound > Sound Mode > Sports.

Optimised sound for watching sports events.

Sports Mode Auto Detection

Press button on your remote control and select Settings > System > Advanced Settings > Sports Mode Auto Detection.

When enabled, any sports programmes will automatically switch to Sports mode for both Sound Mode and Picture Mode.

Note:

This function may not be applicable in some models/countries/regions.

Turning on this function could increase energy consumption.

Media

Press (A) / (A) button on your remote control and select More Apps > Media.

Media is a central location for you to view or listen to different types of content, such as photos, music and movies. You can view media content through the following methods:

- A USB thumb drive or hard drive.
- Compatible mobile phone, tablet or other personal devices: you can stream movies, music and photos that are stored on compatible personal devices and play or view the content on your TV.

By default, there is **Content Sharing** displayed on the Media screen. If your mobile device is connected to the TV, its name also appears on the Media screen.

For more information about **Content Sharing**, please refer to Benefits of Smart TV > Content Sharing in this manual.

Enjoy Photos/Audio/Video Stored on a USB Device

Press button on your remote control and select More Apps > Media > connected devices.

Select the content you want to play on the screen, like pictures, videos and music.

- 1. Search the content you want to play.
- 2. Arrange the content list by Grid, List.
- 3. Sort the content list by Name, Date Modified, Size.
- 4. Filter the content list by All Media, Photo, Video, Music, Recorded.
- 5. Create a photo, music, or video playlist.
- **6.** When the focus is on the first line, there will be an arrow on the left side. Select the arrow to enter multiple storage sources.

Note:

Some options in the above table may not be available in some models/countries/regions.

You must obtain any required permission from copyright owners to download or use copyrighted content.
 We cannot and don't grant such permission.

Play Background Music while Viewing Pictures

- 1. Choose a picture to display.
- 2. Press \(\bigwedge \)/\(\bigwedge \) button to display control bar.
- 3. Select Background Music and choose your music to create a Music Playlist.

Now you can play background music while viewing pictures.

Audio Format

Due to differences in programming tools and other factors, some of the file formats that are listed may not be supported.

The listed formats may not be supported depending on the model.

For 4k models:

Container	Audio Codec	File Extension Name
WAV	Mpeg1/2 Layer1	.wav
MP3	Mpeg1/2 Layer2	.mp3
	Mpeg1/2 Layer3	
AAC	AAC, HEAAC	.m4a .aac
WMA	WMA	.wma
	WMA Pro	
PCM	LPCM	N/A
	ADPCM	
AC-3	AC-3	.ac3 .m4a
FLAC	FLAC	.flac
OPUS	OPUS	.opus

For 2k models:

Container	Audio Codec	File Extension Name	
WAV	Mpeg1/2 Layer1	.wav	
MP3	Mpeg1/2 Layer2	.mp3	
	Mpeg1/2 Layer3		
AAC	AAC, HEAAC	.m4a .aac	
WMA	WMA	.wma	
	WMA Pro		
PCM	LPCM	N/A	
	ADPCM		
AC-3	AC-3	.ac3 .m4a	

Container	Audio Codec	File Extension Name
FLAC	FLAC	.flac
OPUS	OPUS	.opus

Photo Format

Due to differences in programming tools and other factors, some of the file formats that are listed may not be supported.

The listed formats may not be supported depending on the model.

For 4k models:

Container	File Extension Name	Mode of Operation	Resolution
JPEG	.jpg .jpeg	base-line	15360 x 8640
		progressive	1024 x 768
PNG	.png	no-interlace	9600 x 6400
		interlace	1200 x 800
ВМР	.bmp	-	9600 x 6400
GIF	.gif	-	6400 x 4800

For 2k models:

Container	File Extension Name	Mode of Operation	Resolution
JPEG	.jpg .jpeg	base-line	15360 x 8640
		progressive	1024 x 768
PNG	.png	no-interlace	3840 x 2160
		interlace	1200 x 800
ВМР	.bmp	-	3840 x 2160
GIF	.gif	-	6400 x 4800

Video Format

Due to differences in programming tools and other factors, some of the file formats that are listed may not be supported.

The listed formats may not be supported depending on the model.

For 4k models:

Codec Name	File Extension Name	Sampling rate
MPEG1/2	.mp4	1920 x 1080p @ 60fps
MPEG4	.mov	1920 x 1080p @ 60fps
AVC(H.264)	.mkv	4096 x 2160p @ 120fps
HEVC(H.265)	.ts	4096 x 2160p @ 120fps
WMV3	.avi	1920 x 1080p @ 60fps
VC1	.wmv	1920 x 1080p @ 60fps
VP8	.flv	1920 x 1080p @ 60fps
VP9	.webm	4096 x 2160p @ 120fps
AV1		4096 x 2160p @ 120fps

For 2k models:

Container	Video Codec	File Extension Name	Resolution and Frame Rate
MPEG	Mpeg1/2	.mpg .mpeg .vob	1920 x 1080p @ 120fps
	Mpeg4		
MP4	Mpeg4	.mp4 .mov	1920 x 1080p @ 120fps
	H.264(AVC)		1920 x 1080 p @ 60fps
	H.265(HEVC)		
MKV	Mpeg1/2	.mkv	1920 x 1080p @ 120fps
	Mpeg4		
	H.264(AVC)		1920 x 1080p @ 60fps

Accessibility Features

Accessibility Menu Setup

Provide menu option to aid the visually or hearing impaired.

Press 🍙 / 🍙 button on your remote control and select 🚳 Settings > Accessibility > High Contrast Menu.

Improve contrast for visually impaired.

Press (a) / (b) button on your remote control and select (b) Settings > Accessibility > Menu Transparency.

Select menu transparency from Off, Medium, High.

Note:

The above functions may not be applicable in some models/countries/regions.

Audio Type Setup

Provide audio description to aid the visually impaired.

Press button on your remote control and select Settings > Accessibility > Audio Type.

Audio Type

Accessibility audio settings.

Audio Format

Select the audio format.

Fader Control

Provide the best sound quality options for the visually impaired.

Note:

• The above functions may not be applicable in some models/countries/regions.

Dialogue Enhancement

Press h / button on your remote control and select Settings > Accessibility > Dialogue Enhancement.

Enable or disable dialogue enhancement.

Note:

This function may not be applicable in some models/countries/regions.

Subtitle Setup

Adjust Subtitle Settings for digital broadcast content.

Press button on your remote control and select Settings > Accessibility > Subtitle Settings.

Subtitle

Enable Subtitle type.

Primary Subtitle

Set the default subtitle language for digital broadcast content.

· Secondary Subtitle

Set the secondary subtitle language for digital broadcast content.

Accessibility Features

Note:

• The above functions may not be applicable in some models/countries/regions.

Screen Magnification

Press how / button on your remote control and select Settings > Accessibility > Screen Magnification.

Allow visually impaired/partially sighted viewers to magnify an area of the screen.

Note:

- · This function is only applicable for some scenarios.
- This function may not be applicable in some models/countries/regions.

FAQ

In this section you will find the answers to the most frequently asked questions.

There is no picture, or the picture is black and white.

Check input cable connections.

Unplug the TV power cord from AC outlet and re-plug after 60 seconds.

Check if the Colour Saturation is set to 50 or higher at \bigcirc / \bigcirc > \bigcirc Settings > Picture > Picture Mode Settings > Colour Saturation.

No sound or the sound is too low.

There is no sound or the sound is too low at maximum volume.

Check if Mute mode is set to on.

Check the volume settings.

Check the volume control of the device (cable or satellite box, DVD, Blu-ray, etc.) connected to your TV.

Make sure that the audio cable is connected to the correct audio output connector on the external device.

My TV cannot connect to the network.

Check network status at 🍙 / 🍙 > 🍥 Settings > Support > System Info > Network Connection Status.

Make sure your modem/wireless router is on and connected to the Internet.

Position your wireless router, modem router, or access point in a central location. Avoid putting it in a corner.

External source connected but no picture or sound.

I have connected an external source to my TV but I get no picture and/or sound.

Check whether the connection between the external device and your TV is correct and secure.

Make sure you have made the correct selection of input source.

If the signal is intermittent, unplug the TV power cord from AC outlet and re-plug after 60 seconds.

When devices are connected with HDMI cables

- · Change to another HDMI port.
- · Change to another HDMI cable.

The remote control does not work.

Confirm that TV still has power and is operational. Press the power button on the TV to determine if the problem is with the remote control or not.

If the TV is not responding to the remote control, then please check if the small light on the remote control flashes when any button is pressed (some remote controls do not support this function).

If the small light does not flash when the remote control button is pressed, the battery power may be low, please replace the batteries with new ones.

Check that the orientation of each battery matches the positive (+) and negative (-) symbols in the battery compartment.

Keep the remote control sensor area clear from obstacles.

For Bluetooth remote controls

If the TV does not respond with the Bluetooth remote control, try pairing the remote control to the TV by pressing and holding the button for at least 3 seconds.

Schedule Recording cannot be used.

Check if there is a storage device connected to the TV.

Check the free space of the storage device. The function will not work if there is not enough storage space on the device.

Check whether your storage device is damaged. If so, it is suggested to format your storage device.

Recording will automatically stop if the signal becomes too weak.

Note:

- · Recording function may not work if the read/write speed of the USB device is too slow.
- Recording function may not work because the storage format of your device is unsupported.
- · The Recording functions may not be applicable in some models/countries/regions.

TV Status Diagnosis

Press () / () button on your remote control and select () Settings > Support > Self Diagnosis.

When the TV malfunctions, you can perform some self-diagnosis to find the problem.

Picture Test

When performing the Picture Test, a test picture will be shown on screen. Select OK to start the test. Picture Test displays a high-definition picture that you can examine for flaws or faults. Please check the picture carefully in the next 10s.

Sound Test

When performing the Sound Test, a test sound will be played with the TV Speaker. Select OK to start the test. Please listen to the sound carefully to check whether you can hear the sound problem.

Network Test

When performing a Network Test, the test will confirm whether your TV is connected to network via the TV screen. If the network test is successful but you still have problems using online services, please contact your Internet provider.

· Bandwidth Monitoring

Test the speed with a third-party website.

Input Connection Test

When performing an Input Connection Test, you can select from the input sources and check related information with external connections.

Status Check

When performing a Status Check, the status of your TV will be displayed showing any error codes.

Remote Control Service

Press button on your remote control and select Settings > Support > Remote Control Service.

Remote Control Service enables your TV to be controlled from the client server to allow service agents to diagnose the problem of your TV and deal with the problem online efficiently.

To use this function:

- 1. Turn on Remote Control Service.
- 2. Select Agree All and Confirm in End User License Agreement page.
- 3. Select Generate PIN in Remote Control Service.
- 4. You can initiate a help request to a service agent by the hotline and provide the on-screen PIN.

Note:

- This function may not be applicable in some models/countries/regions.
- Steps above may vary. Please refer to the specific product.
- · Keep the network connected when the Remote Control Service is running.

Picture Issues

When the TV has a picture problem, these steps may help resolve the problem.

Press h / button on your remote control and select Settings > Support > Self Diagnosis > Picture Test.

Before you review the list of problems and solutions below, use **Picture Test** to determine if the problem is caused by the TV. **Picture Test** displays a high definition picture that you can examine for flaws or faults.

- If the test picture does not appear or there is noise or distortion, the TV may have a problem. Contact the service company in your country/region.
- If the test picture is displayed properly, there may be a problem with an external device. Please check the connections.
- If the problem persists, check the signal strength or refer to the external device's user manual.

Problem	Possible Solutions
The picture is distorted.	 The compression of video content may cause picture distortions, especially in fast moving pictures from sports programmes and action movies. If the signal reception is weak or poor, screen distortion may be visible but it is not a malfunction. Mobile phones used close to the TV (within 1m) may cause noise on analogue and digital channels.

Problem	Possible Solutions
The picture is blurry or flickering, or cuts out momentarily.	 Press h / h button on your remote control and select Settings > Picture > Picture Mode Settings > Sharpness. You can try to increase or decrease the Sharpness. If you use an external antenna, check the direction, position and connection of the antenna. Adjust the direction of your antenna, or reset or fine tune the channel.
The picture appears red, purple, pink and other colours.	 Press h / b button on your remote control and select Settings > Picture > Picture Mode Settings > Expert Settings > White Balance. You can try to increase or decrease the White Balance.
Picture distorted or appears wavy.	 Some electrical appliances may affect the TV. If you turn off the appliance and the interference goes away, then move it further away from TV. Insert the power plug of the TV into another power outlet.

Related information

There is no picture, or the picture is black and white. on page 69

Sound Issues

When the TV has a sound problem, these steps may help resolve the problem.

Press how / how button on your remote control and select Settings > Support > Self Diagnosis > Sound Test.

If the TV plays the **Sound Test** melody without distortion, there may be a problem with an external device or the broadcast signal's strength.

Problem	Possible Solutions
Picture is normal, but no sound.	 Check the volume settings. Check if 'Mute' mode is set to on. Check the volume control of the device (cable or satellite box, DVD, Bluray, etc.) connected to your TV.
The speakers are making an odd sound.	 Make sure that the audio cable is connected to the correct audio output connector on the external device. For antenna or cable connections, check the signal information. A low signal level may cause sound distortions.
Sound is distorted.	 Some electrical appliances may affect the TV. If you turn off the appliance and the interference goes away, then move it further away from TV. Insert the power plug of the TV set into another power outlet.
Sound is distorted or cuts out momentarily.	 If you use an external antenna, check the direction, position and connection of the antenna. Adjust the direction of your antenna or reset or fine tune the channel.

Related information

No sound or the sound is too low. on page 70

Network Issues

When the TV has difficulties in connecting to the Internet, these steps may help resolve the problem.

Press hutton on your remote control and select Settings > Support > Self Diagnosis > Network

Test

If the TV network is connected, the screen will display Connected successfully.

Problem	Possible Solutions
The TV cannot connect to apps.	 Make sure the TV has a network connection. Press (a) / (a) button on your remote control and select (a) Settings > Support > Self Diagnosis > Network Test. Contact your Internet service provider.
The wireless network connection failed.	Make sure your wireless modem/router is on and connected to the Internet.
The wireless network signal is too weak.	Position your wireless router, modem router, or access point in a central location. Avoid putting it in a corner.

Related information

My TV cannot connect to the network. on page 71

Channel and Broadcast Issues

For problems while watching live TV or scanning for new services, these suggestions might help to resolve any issues.

Problem	Possible Solutions
In Live TV, there is no signal, or a weak signal, or you cannot find any channels.	 Make sure that the antenna cable is connected to the correct port. Make sure that the antenna cable is not loose or disconnected. If "no signal or weak signal" occasionally happens, disconnect antenna cable and reconnect it. Run Reset to Factory Default or scan channels again. Press / button on your remote control and select Settings > Support > Reset to Factory Default. In Live TV, press / button on your remote control and select Settings > Channel > Auto Scan/Advanced Settings > Manual Scan.

Related information

Prepare Live TV on page 8

External Device Connection Issues

When the TV has difficulties with external device connection, these solutions may help resolve the problem.

Problem	Possible Solutions
The TV is having trouble receiving a signal from an external set top box.	 If there is no signal occasionally, unplug cable from TV and re-plug after 60 seconds. If there is always no signal, or the signal cannot be restored after plugging and unplugging, you can press ♠ /♠ button on your remote control and select ⊚ Settings > System > HDMI & CEC > HDMI Format, to confirm whether the signal can be recognised. Change to another HDMI port. Change to another HDMI cable.
There is no sound.	 Check whether ARC is selected at

Related information

External source connected but no picture or sound. on page 72

HDMI & CEC Issues

When HDMI & CEC is not working, these steps may help resolve the problem.

Problem	Possible Solutions
HDMI & CEC does not work.	 Confirm that the device is a HDMI & CEC compatible device. Check if the power cable of the HDMI & CEC device is properly connected. Check the cable connection of the HDMI & CEC device is secure. Check HDMI & CEC feature of your TV is turned on.
	Press button on your remote control and select Settings > System > HDMI & CEC > CEC Control. Check HDMI & CEC feature of the connected device is turned on. Depending on the connected HDMI device, the HDMI & CEC control feature may not work.

Related information

Use HDMI & CEC on page 36

Media Files

When files will not play, this may help resolve the problem.

Problem	Possible Solutions
Some files cannot be played.	 Most files can be played back, but you might experience problems with corrupted files or files with high-bitrate, unsupported resolution, unsupported container or codec formats.

Related information

Media on page 63

Voice Service Issues

When some Voice service will not function, this may help resolve the problem.

Problem	Possible Solutions
Alexa cannot be heard.	 You can try to log into your Amazon account. If you hear "I don't understand" from the voice recognition, please change account or log out of the account. For more information about Alexa, please refer to Benefits of Smart TV > Voice Service Setup > Alexa Setup in this manual.

Other Issues

Use these procedures to resolve other issues that may occur.

Problem	Possible Solutions
The TV is hot.	 Watching TV for an extended period of time causes the panel to generate heat. The heat from the panel is dissipated through internal vents running along the top of the TV. After extended use, you may feel heat when touching it. This heat is not a defect and does not affect the TV's functionality.
The TV smells of plastic.	This smell is normal and will dissipate over time.
The plastic cabinet makes a "clicking" type of sound.	 The "clicking" sound can be caused when the temperature of the TV changes. This change causes the TV cabinet to expand or contract, which makes the sound. This is normal and the TV is OK.
When I turn on my TV, there is a delay for a few seconds before the picture appears. Is this normal?	Yes, this is normal. The TV is initialising and searching for the previous setting information.
